We are taking this opportunity to introduce our company, **Air & Gas Technologies, Inc.** to your department. Air & Gas Technologies, Inc. has been one of the leading providers of Breathing Air equipment for the past 15 years. As a **Bauer Compressor** factory Sales and Service Center, our company has been a “Top 10” Distributor over the past years. This is an achievement that we pride ourselves upon due to the fact that it is based on both Sales and Service. Our factory trained technicians offer service 24 hours/day, 7 days a week. In addition, we only offer original OEM parts for the equipment that we service. In addition to **Bauer**, we offer parts, service and maintenance contracts for **Eagle, Hypres, Ingersoll Rand, Mako, Poseidon** and **Scott** breathing air compressors and fill stations.

In addition to breathing air systems, we offer NFPA compliant fill stations for **Oxygen** and **SCUBA** use. Our company will custom order and size manifold distribution system based on your department’s use.

Another major focus of our company is the public safety technical dive market. As the factory authorized sales and service center for **Interspiro**, we offer the complete line of **AGA/Divator Masks** with accessories (**Ocean Technology Systems, OTS**). In addition, we offer training to certify technicians for the repair of the **Interspiro** equipment as well. This training is conducted at our factory training and repair facility in Milford, CT and can be offered on site as well depending on the number of participant’s available.

Working with the dive industry, we have established a relationship with **Ocean Management Systems. OMS** is a provider of technical dive equipment for the Public Safety Sector as well as the Military. OMS offers a complete line of Buoyancy Compensators, Fins and Regulators which are approved for US Navy use (ANU).

Log on to our website at www.divatormask.com for more information on some of the equipment that we have to offer. We look forward to speaking with you in reference to your equipment needs.

Respectfully,

Gerald A. Barrett Jr.

Gerald A, Barrett Jr.
